VSCode, Jira, Wireframes, Github, Scrum, Agile

Speaking, Writing, Prototyping, Testing

CODE

HTML5 / CSS, React.js, JavaScript (ES6), TypeScript, REST, AWS Backend, Redux / Router, Webpack

GRAPHIC

Figma, Adobe XD, Material UI, Semantic UI

WORK HISTORY

Molloy Moreno LLC — *Front End Developer*
Issaquah, WA | June 2021 - Sept 2021

- ❖ Developed and shipped Project Elpis, a serverless web app that helps high school students track their career progress. Currently in beta use at an NYC high school with over 100 at-risk students.
- ❖ Built over 15 wireframes for the user interface using Adobe XD.
- ❖ Utilized React and HTML/CSS along with AWS backend to create features allowing teachers to add new students, download student progress forms, and create / assign learning pathways.

Democracy Lab — *Front End Developer / UI Designer*
Issaquah, WA | April 2021 - December 2021

- ❖ Designed 7 UI mockups on Figma for the user guide section of the iSeaTree mobile app, which helps kids in Washington State identify and learn about the local indigenous tree species.
- ❖ Utilized React.js to develop the website for Accessibility Ratings, a web app to help users submit feedback about accessibility of popular apps to their respective companies. Attended bi-weekly meetings to help design mockups for CodePDX Portland.

Self Employed Designer / Developer —
Issaquah, WA | Aug 2020 - present

- ❖ Engineered 9 unique projects including: Google Chrome extension to block YouTube videos, Distance calculator for any 2 cities in the US using React.js, Andrew Yang White House.gov mockup using React.js and Material UI / Semantic UI libraries.
- ❖ Utilized Figma and Adobe XD to construct over 15 designs, which were published on design forums like Dribbble, or used in my own projects.
- ❖ Used project-based learning to learn over 10 front-end technologies, such as React, JS libraries, CSS, and Firebase / Netlify for hosting.

Endevre Technologies — *Chief Marketing Officer / lead designer*
Cupertino, CA | Sept 2017 - present

- ❖ Negotiated with school clubs, and local organizers to sponsor company products at 3 hackathons in the Bay Area.
- ❖ Designed/prototyped web pages & logos for the company using Figma by creating mockups.

Quora — *Online Writer / Blogger*
Seattle, WA | Apr 2017 – present

- ❖ Answered over 350 questions on Quora about various topics, including history, tech, and trivia.
- ❖ Generated over 25 million views and 10K+ followers without advertising. Answers have been translated into multiple languages, including Hindi, French, Chinese, and German.
- ❖ Managing my own blog on Quora about futuristic tech that has over 30,000 followers. Contributor to entrepreneurial blog with over 2 million followers.

EDUCATION

Bellevue College — *B.S. Computer Science*
Bellevue, WA | Sept 2019 - June 2022 (Expected)

- ❖ Treasurer of the CS Dept. Student Advisory Board.
- ❖ Utilized React.js and Adobe XD to prototype and develop a street food review web app for the year-long senior capstone project (in progress).

Coursework: Data Structures, Databases, Project Management, Computer Architecture, Algorithms, Programming Languages, Operating Systems, Computer Networks, Web Programming

Planning on attending graduate school in Fall 2022 tentative.

Cupertino High School — *High school diploma*
Cupertino, CA | Aug 2015 - June 2019
Top 10% English literature student in sophomore year.
Speech and Debate member in freshman / sophomore year
